When it comes to escape the real world and kill some time, it is difficult to beat the magic of some PC games. If you are worried about what a hobby of game could do at your tight budget right now, we covered you. The fun game you get even better when you find games you like that you can play for free on your PC. Let's take a look at some of the top-rated free PC games, according to Tech Radar and PC Magazine, through a range of genres. Fortnite Fortnite is probably the most popular game in Battle Royale to hit the world of technology in quite a while. The game throws you into a world with 99 other players, where you engage in a free battle for everyone until only a standing player remains. You think you look bloodthirsty? Well, one of the best parts of the game is that you can play with your friends — regardless of the platform they have, PC or game console — then prepare for some "friendly" backstabbing. Photo Courtesy: @FortniteGame/Twitter Although you are not playing with friends, it is easy to find a game to join, and the game is highly addictive. If you collect resources, build structures and shoot your enemies is what you are looking for in a game, Fortnite is the game for you. League of Legends is one of the most played online multiplayer battle arena games (MOBA) available for your PC. In this game, you need to coordinate with your teammates to destroy the base of the opposing team. Do not expect to master the complexity of this game during the night, but Start as soon as you click on the "Play" button.
